Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed 10/11/01 has been considered and placed in the application file.

Claim Objections

2. Claim 6 is objected to because of the following informalities: In claim 6, line 4, it is suggested that applicant adopt the following language: "wherein the total weight" or "with the proviso that the total weight" in lieu of "while the total weight". Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
4. Claims 10, 11 and 13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
 - A) The recited "viscosity of 10-300 mPa.s" per claim 10 constitutes indefinite subject matter as per the conditions under which such was obtained is not readily ascertainable.
 - B) The recited "A polymerization process comprising the polymerization of a monomer in the presence of an emulsion according to any one of claims 1-5" engenders awkwardly expressed claim language. The following language is suggested: "A polymerization process comprising polymerizing a monomer in the presence of an emulsion according to any one of claims 1-5".

Application/Control Number: 09/889,436
Art Unit: 1713

- C) The recited "comprising one or more peroxides" per claim 13 constitutes indefinite subject matter as per it not being readily ascertainable as to how such further limits the antecedently recited "peroxide".

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Application/Control Number: 09/889,436
Art Unit: 1713

8. Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP 492,712 in combination with International WO 98/18835, Lundin et al(U.S. 4,499,250) or Lundin et al(U.S. 4,547,481) and Satomi et al(U.S. 4,734,135) as per reasons clearly set forth in the previous Office Action per paper no. 7, 12/17/01, paragraph no. 8. As to the newly added dependent claims, the limitations are either taught by the prior art combination supra, suggested by the prior art combination supra or would have been obvious to the skilled artisan and with a reasonable expectation of success. There is absolutely nothing viable on this record diffusing this issue.

Response to Arguments

9. Applicant's arguments filed 04/15/02 have been fully considered but they are not persuasive.

Relative to the 112, 2nd paragraph issue—It is urged and maintained that the conditions under which the viscosity limitation per claim 10 was obtained is not readily ascertainable. Although Counsel has provided several patents that use the claimed viscosity terminology, Counsel is herein apprised that each application stands on its own, i.e., is treated on its own merits.

Relative to the rejection under 35 USC 103—It is urged and maintained that the instantly claimed invention is obvious within the meaning of 35 USC 103 over the prior art combination supra as per reason clearly set forth in the Grounds of Rejection of record.

The crux of Counsels arguments appears to hinge on each of the secondary references adding a multiplicity of components to the already existing compositional formulation of the primary reference EP'712 and, to this end, and with all due respect to Counsel's opinion, the secondary prior art simply provide

Application/Control Number: 09/889,436
Art Unit: 1713

ample motivation to employ an ethoxylated fatty alcohol, as claimed, in the compositional formulation of EP'712 and with a reasonable expectation of obtaining its cumulative, additive effect. Criticality for such, not having been demonstrated on this record. Moreover, even if this were not the case and Counsel was right, the claims don't preclude additional components since the term "comprising" is an open door invite for additional ingredients.

Conclusion

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
